Design Features

-  US / UL 508, 508E & UL508 Type E Listed
- Class 10 Overload Trip
- Adjustable Thermal Protection 0-63 Amps
- Ambient temperature compensated (-20°C - +60°C) - 4.0°F - +140°F
- Common Accessories for MBS32 & MBS63 Motor Switches
- Single phase sensitivity
- Short circuit protection (50kA)
- Tamper Proof - Cover over adjustment dial
- Identification marker plate
- 50kA - IC MBS32HG / MBS63HG
- Finger Safe Pressure Wire screw terminals
- Front & Side Mount Auxiliaries
- Clear indication (OFF/TRIP/ON) Operator handle
- Padlockable OFF Operator (Lockout / Tagout) Safety Requirement
- Test Trip Function
- 35mm Din rail mount or Screw Mount
- Type 2 Coordination

MBS32 / MBS63 COMBINATION ADVANTAGES

AEG

MBS32 / MBS63 AEG Combination Motor Controllers

OLD WAY		NEW WAY		ADVANTAGES:
MCCB	→	✓ MBS32/63	=	• 1/2 the size!
LS		✓ LSK Contactor		• Cost Savings
Overload				• Higher Interruption Capacity

- 1) As of July 2001, UL's new "Self Protected Combination Controller" approval takes effect (Per UL 508 Type E)
- 2) AEG's type MBS32/63 is UL 508 Type E approved, which permits their use per NEC Code 430-52 in place of the Circuit Breakers or a Fusible Disconnect.
- 3) The new UL 508 Type E approved AEG Self Protected Combination Controller does not require the UL 489 breaker or extra overload relay! Tremendous product and space savings result!

AEG Combinations, type MBS32/63, are approved as combination starters per UL 508E. (Type 2 Coordination)

Description

AEG MBS32 / MBS63 Series Motor Circuit Controllers offer a complete line of compact, reliable and easy to install Protection Solutions. The MBS Controllers are 100% factory calibrated for precise adjustable current ranges from (0.1 - 63 Amps) in two frame sizes. Both frame sizes, MBS32 and 63 also include magnetic/s instantaneous short circuit protection.

The "MBS32 CS" - Combination
(Rocker lever design)
With a "standard" interruption
capacity of 22kA @ 480V.

The "MBS32 CH" - Combination
(Rotary lever design)
With a "high" interruption capacity
of 50kA @ 480V.

Rating

The MBS32 is available in the current range of 0.1 - 32 Amps with compact 1^{3/4}" (45mm) width and the MBS63, with the current range of 6.3 - 63Amps, has 2^{1/8}" (55mm) width. For application versatility & users preference, the "MBS32" version is designed with two operator options. One type is the rocker lever design, the other is a rotary design (seen to left of page).

Accessories

The unique design of MBS32/MBS63 Motor Circuit Controllers have many common accessory kits that work with both MBS32 & MBS63 models. This reduces the need for additional inventory and saves additional costs. **The accessories include:**

- **Front & Side Mount Auxiliaries**
(Flexibility to meet space requirement)
- **Alarm Contacts**
(Short circuit with reset indicator
aux/alarm & overload alarm)
- **Shunt Trip**
(For remote trip requirements)
- **Undervoltage Trip**
(For safety measures, no
dangerous automatic restarts when
power comes back on)

Combination
with contactor
Type 2
Coordination

General Applications

- Combination Controller (*self protected*)
- Manual Motor Controller
- Group Installed Controller

Specific Additional Applications

- Type 2 Coordination - IEC / EN60947-4-1
- Disconnects
- Main Switch
- Circuit Breaker (IEC 947-2)

INDIVIDUAL INSTALLATIONS

UL The MBS Motor Circuit Protector provides a "Disconnecting Means" with "Short Circuit Protection" and adjustable thermal overload protection. The MBS32 / MBS63 are cost effective, compact and easy to install. Typical "Individual Installations" are shown below.

**Meets UL508
Type E
Requirements**

UL508 "TypeE"
Motor Load
Applications
DO NOT Require
Upstream Branch
Circuit Protection

120V, 220V,
480Y/277V,
600Y/347V

The MBS32 / MBS63 Motor Protectors are an "excellent" choice for ALL TYPES Protector Applications. They are also UL Listed as for use in Group Motor Installations Typical Group Installations shown below:

GROUP INSTALLATIONS

Save on Panel Space, Component Costs, Wiring and Mounting Time
Applications Include: Pumps, Compressors, Multi Motor Machinery such as
Conveyors, Machine Tools, Textile and Packaging Equipment

① Selection of the controller depends on the actual motor full load current and service factor. For motors with service factor of 1.15 or greater, use motor full load current to select the approximate current range. For motors with a service factor less than 1.15, multiply the normal full load current by .9 for the current setting.

② Single phase applications require all three overload legs to be energized for proper operation. Use separate conductor to connect terminal T2 to L3. Connect power to L1 and L2 and apply load between T1 and T3.

③ Enclosed unit includes safety door interlock & external operator.

Product range of Accessories

- Auxiliary contacts (frontal & lateral)
- Alarm contact block
- Auxiliary and alarm contact block
- Short-circuit alarm contact block
- Undervoltage release
- Undervoltage release with 2NO early make contacts
- Shunt Trip Device

Auxiliaries

Technical performances

- All auxiliaries can be mounted and changed easily, without any tools
- Both frames MBS32 and MBS63 use same auxiliaries
- All terminals are capable for 2 cables (0.5mm² - 2.5mm²)
- Side auxiliary contacts are rated to A600, P300 duty
- Frontal auxiliary contacts are rated to B300, Q300 duty
- Minimum operational contact 5mA, 17Vdc
- All terminal screwhead are Pozidriv 2 and slotted combination

Accessories

START / STOP OPERATOR (Nema 3R,12,4X)	-KSS-3	\$90.00	
START / STOP OPERATOR (Nema1)	-KSS-2	\$35.00	
HAND-OFF-AUTO + START BUTTONS (Nema 1)	-KSL-4	\$70.00	For Pump Panels
HAND-OFF-AUTO + START BUTTONS (Nema 3R,12,4X)	-KSL-5	\$100.00	For Pump Panels
FWD / REV / STOP PUSH-BUTTONS	-FRS	\$160.00	
GREEN PILOT LIGHT (Nema1,4X,3R,12) ②	-PLG	\$60.00	
RED PILOT LIGHT (Nema1,4X,3R,12) ②	-PLR	\$60.00	
208/230/460-120 Transformer (50VA) ③	-FT___①	\$135.00	No Primary fusing
For sizes LS05-LS18K combinations	-PFT___①	\$223.00	③ Primary fusing included
208/230/460-120 Transformer (100VA) ③	-FT___①	\$280.00	No Primary fusing
For sizes LS22K-LS30K combinations	-PFT___①	\$368.00	③ Primary fusing included

① Transformer will be wired per the primary voltages specified: for example “-FT 480” (480V Primary)

② Voltage of pilot light will be that of the control voltage specified in control part number.

③ Primary fusing required for UL listed control panel with transformer.

THE “MBS32 CS” - COMBINATION

(Rocker lever design)

With a “standard” interruption
capacity of 22kA @ 480V

THE “MBS32 CH” - COMBINATION

(Rotary lever design)

With a “high” interruption capacity
of 50kA @ 480V

DIMENSIONS MBS MMP & COMBINATIONS

STANDARD SHAFT		
X - Dimensions		
Type	Min.	Max.
MBS32CH	133.75 (5 ^{1/4})	292 (11 ^{1/2})
MBS63CH	152 (6)	308 (12 ^{1/8})

X = Dimension from bottom of switch to inside enclosure cover.

Note: See below for combination minimum necessary depth.

MBS25 MOTOR / CIRCUIT PROTECTOR ACCESSORIES

AEG

3 Phase bus
connections and
supply block 209

MBS 25-107
Mushroom Key
Release Kit

MBS 25-105 Lock Off Kit

MBS 25-206

Starter carrier type pl 54
for snap-on to DIN rail

with 2 integral DIN rails for mounting of motor
starter and contactor

MBS 25-206

\$15.00

3 phase busbar block type d
fully isolated, $U_i = 660V$, $I_u = 80A$

with 2 connections, length 99 mm
with 3 connections, length 155 mm
with 4 connections, length 208 mm
with 5 connections, length 262 mm

MBS 25-210

\$16.00

MBS 25-240

\$16.00

MBS 25-207

\$22.00

MBS 25-208

\$25.00

Protection cover 3 pole

for unused busbar terminations

MBS 25-211

\$ 2.00

Supply block type db

fully isolated, $U_i = 660V$, $I_u = 80A$

3 pole for 3 phase busbar block type d

MBS 25-209

\$16.00

-C 240V 60Hz 220V 50Hz
-D 380V 50Hz
-E 480V 60Hz
-G 24V 60Hz

Combination Rail Mounting Brackets
Includes 2 DIN Rails to mount
MBS25 and LS contactors MBS 25-206.

- Combination Manual Motor Controls are an ideal way of having short circuit protection provided with Magnetic Instantaneous trip as well as inverse time thermal protection built into one compact package.

- To increase short circuit protection to 50KA add option ID50 - current limiter (380 Vac) max.

- The combination allows you to utilize all MBS 25 options including Remote Shunt Trip, Undervoltage Trip and additional auxiliaries if required. (Found on page 96.)
